

Investment strategy highlights

BankInvest Global Equity Income is a bottom-up stock picking strategy. The ambition is to achieve a competitive total return with focus on 1) risks, 2) cash flow/dividends, and 3) share price appreciation.

Over the long term, dividend paying stocks have outperformed and shown lower risk than the market – this is well-documented.

Investment philosophy

1) Certainty principle: The most certain aspect of investing is uncertainty. Hence, risk is the first pillar of the investment philosophy.

2) Cash flow/dividend focus: Focus on both generation of cash flow and use of cash flow. Dividends are paid by cash flows. Focusing on companies with high and stable cash conversions.

3) No conviction: No conviction bets and equal weighted portfolio.

4) Strategic focus: Focus on “Need to have” over “Nice to have” products and services. The resilience of the former becomes obvious in times of economic uncertainty.

5) Ambition: Avoiding “losers”, rather than picking “winners”.

About the strategy

Portfolio construction

- Approx. 50 stocks with 1.0-2.5% in each stock (equally weighted).
- All sectors in developed markets (excl. fossil fuels and tobacco).
- The portfolio is more-or-less sector neutral (to reduce “macro risk”).
