

**Investment strategy highlights**

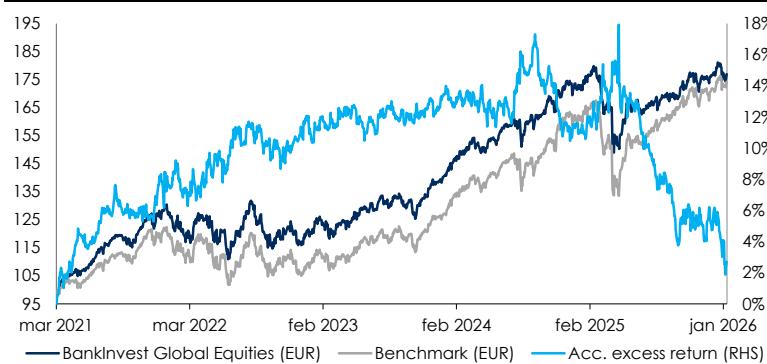

BankInvest Global Equities is a bottom-up stock picking strategy. The ambition is to achieve a competitive total return with focus on 1) risks, 2) free cash flow / capital allocation, and 3) share price appreciation.

**Investment philosophy**

- 1) Certainty principle:** The most certain aspect of investing is uncertainty. Hence, risk is the first pillar of the investment philosophy.
- 2) Free cash flow focus:** Ultimately, free cash flows determine long-term shareholder value creation. Thus, the second pillar is free cash flow, its quality, growth, and usage. Preferring companies with high and stable cash conversion.
- 3) No conviction:** No conviction bets and avoiding "macro bets". Approx. 50 stocks, broadly diversified on sectors and countries/regions.
- 4) Strategic focus:** Focus on "Need to have" over "Nice to have" products and services. The resilience of the former becomes obvious in times of economic uncertainty.
- 5) Ambition:** Avoiding "losers", rather than picking "winners".
